## ELAN planning information

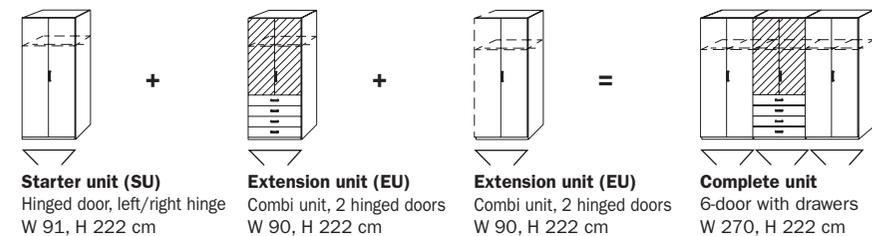

### Basics and structural principles of ELAN wardrobes:

- 1.) **Two different heights (222 and 236 cm)**, plus a 45 cm width pattern, allow planning to be carried out in a way that suits each individual room.
- 2.) Thanks to **starter units (SU) and extension units (EU)**, the wardrobes are easy to plan and can be extended however you wish. Wardrobe planning always begins with a starter unit and can be extended at will using extension units. EUs contain a centre panel rather than outer panels, which means that the outer panel of the SU is used as an end panel during planning work.
- 3.) In the case of **corner combinations**, planning is carried out up to the relevant corner wardrobe using SUs. Once you have reached the corner wardrobe, you always begin left or right with a starter unit.
- 4.) All handles on wardrobe units are fastened to the doors vertically, using adapters.  
**Exceptions:**
  - **1-door corner wardrobes** in all designs – in this case, handles are fastened horizontally
  - **Combination units**, W 45 cm without mirrors in front designs A and B – handles are fastened horizontally on the front in this case too.
- 5.) Cornice solutions are available for stand-alone wardrobes (**W 45 to 315 cm**) and for corner wardrobes, in 6 body colours. You can also find versatile and practical **wardrobe accessories** in this list.
- 6.) Beds and chests are also available in the wardrobe colours (see article list).
