# ALANDO

## Combination examples for corner-robos with hinged and gliding door robes

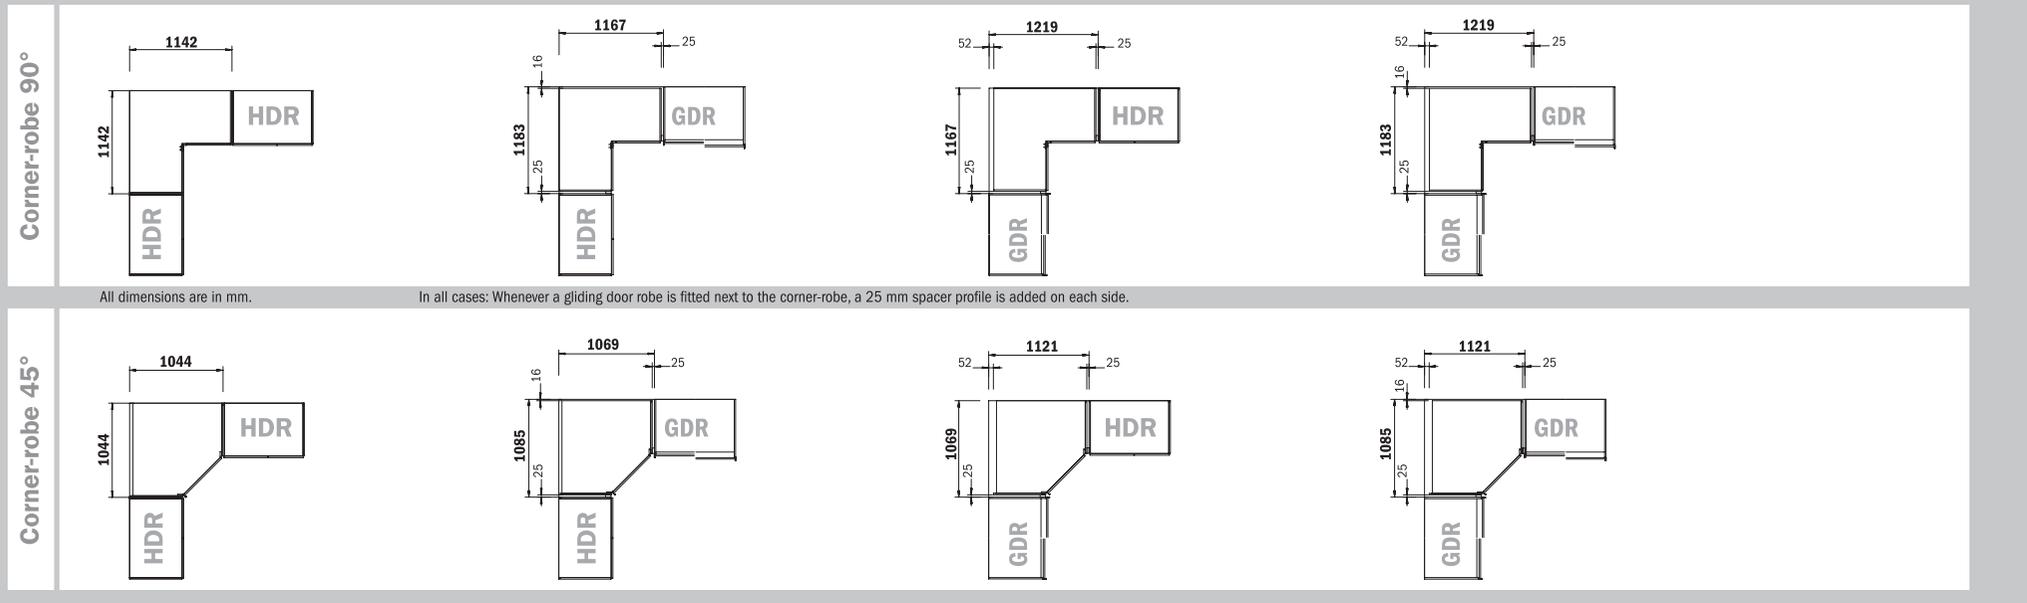

### Freely combinable:

With ALANDO, combining different robes even around corners is no problem at all. All you have to take into account is the different overall widths of the selected combination (see the example drawings below).

Depending on how you choose to arrange robes with gliding doors (GDR), hinged doors (HDR) and corner-robos, due to the spacer profiles, the overall dimension between the robes and/or the wall clearance will differ.

**Every corner-robe is supplied complete with the spacer profiles you will need!**

### Space required for corner-robos with different build-on options

### Build-on options with hinged and gliding door robes

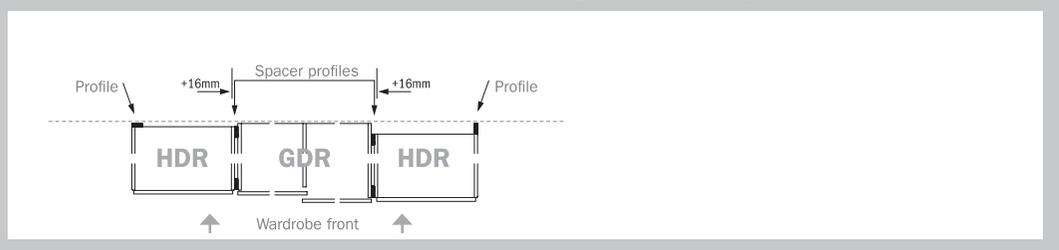

#### Fitting one by one:

The set of 3 spacer profiles that is available as an optional extra is used to fit hinged and gliding door robes next to one another.

The examples show how the spacer profiles for gliding door robes (GDR) are fitted alongside hinged door robes (HDR):

- 2 profiles maintain the distance between the wardrobes to prevent the doors jamming when opened.
- The 3rd profile closes the gap to the wall caused by the different depths of the wardrobes.
- The profiles are suitable for fitting on the left or right (see drawings).
- **You will find the set of spacer profiles on the PASSEPARTOUTS page.**

#### Arrangement of spacer profiles when fitting hinged and gliding door robes

### Selecting articles from the price list

...the **123** ordering system:

- 1** Select the colour code for the desired front and colour variation from the table overleaf (e.g. **Z123**\_).
- 2** Find the identification letters for the colour of the handle/profile and enter them in the space in the colour code (e.g. **Z123C**).
- 3** Select article (**width and height**) and simply read the **article no.** and **price** from the row below according to the front variation.
